Improving Facilities Management performance through PRODUCTIVITY

11th February 2015 ■ 2pm to 5pm ■ Fee: $150 non member : $135 IFMA & FPNet member

Productivity is not a subject discussed much in facilities operations and support services. It would seem unrealistic to most facilities practitioners, especially if their facilities team are always fighting fire every other minute.

Most facilities practitioners have misunderstood the meaning to be productivity. Essentially, productivity not only means improvement, making work quicker, it also look at making work easier, simpler and safer.

In today's dynamic and competitive business environment, an understanding of productivity is a must for facilities practitioners to stay relevant and add value to their organisation. They must know that productivity in facilities operations would mean a conducive and safe environment for the organisation to conduct business activities.
